Acousti Engineering of Florida

Re: Palms West Hospital C-Section Project and 4th Floor Renovation Project

To Whom It May Concern:

We worked with Acousti on these two projects and it was an absolute pleasure from the pricing of the projects to the close-out of the projects. The Project Management of the project was very professional and extremely helpful. The installation crews were friendly, conscientious, professional, knowledgeable and safe while working on the project. Acousti was flexible with installation schedules and they also kept the areas clean. The final product from the VCT to the sheet vinyl was one of the best installations that I have seen on my projects.

I would recommend Acousti to any General Contractor or Client. I look forward to working with Acousti on future projects.

Sincerely,

Mike Dillistin
Project Manager
Anderson-Moore Construction
